Claudia (and Corey),

I sat on the Coordinators call and I think

Personal Privacy / Ex. 6

Personal Privacy / Ex. 6

Re: this ESA request, I am having some trouble accessing the spreadsheet from home, but here's what I have from R3 and R10:

R3: same info as is currently in the spreadsheet for DE
R10:

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

Angela and Matt think WA aquatic life criteria could be on the near future radar, given the petition and outdated criteria (these would be all pollutants from the NTR)

Angela also asked about consultation on narrative provisions like MZs and Compliance Schedules, but we weren't sure Sara was as concerned with this right now.

Sorry to bail on the rest of today, hope this is what you need.

-Erica

Apologies but I just found out that Sara needs this info by COB today. Do your best- a quick call to your region is probably the best way to get this info. Thank you.

Hello liaisons!

Sara would like some information on what pollutants the regions need the most help with for ESA consultation. Please enter any upcoming ESA support they'll need in the ESA column in the Forecasting spreadsheet by 9/11. If you have additional thoughts on what pollutants generally tend to stump your regions when it comes to ESA, you can also respond to me via email.

In general, please try your best to keep this spreadsheet updated when you hear from your region about technical assistance needs.

Thanks!

Claudia

Quick note:

- If you open to edit this in Excel (as opposed to Online Excel), it will open in Read-Only (don't ask me why, even the help desk couldn't figure it out after an hour!), and you will need to hit "Edit Workbook". Then just hit the save button in the upper left as you go and when you're done and it will save to OneDrive/Sharepoint. Note: the save button will not have the little arrows in it like you're used to from SharePoint editing (again, don't ask). It will look like  instead of .
- If you open to edit in Online Excel, some capabilities will be limited, like being able to use two different color fonts in the same cell.

Please let me know if you run into any issues! Thanks.

Here's the technical assistance forecasting spreadsheet we discussed today. As we discussed, we will use a regional branch meeting once/month to make sure this is updated, but please go in and enter any issues you know of right now and as they come up, following the way I've done it so far. (Folks may need to correct the colors that I guessed when entering some examples so far).

Please use this to note criteria issues that are coming up in your states or tribes where you or the region think that technical assistance will be needed from HECD/Julie, or where we will need to work with OWOW and OWM. DO NOT use this to note issues that will need policy assistance, like a variance issue that needs Gary/Manjali, for example.

A few things to note:

Deliberative Process / Ex. 5

- Please add columns for aquatic life criteria if you're dealing with a criteria issue that isn't up there yet.
 - This will be shared with HECD, but not with the regions for now.
 - You can always find this document in "Shared with me" on the left when you're in your OneDrive.
 - Editing in Excel (instead of online excel) will give you the full functionality and is recommended. Just hit save in the upper left when you're done making changes.
- Please fill the spreadsheet out/correct my entries in the next week (by next branch meeting on 4/7).

Any questions, please ask!
